Thananjayan Aruljothy

AI Full-Stack Engineer | Python, Flask, OpenAI & LLM Apps | Building scalable AI-powered web solutions
Sri Lanka

Summary

I am an AI Full Stack Developer specializing in building intelligent applications powered by Large Language Models (LLMs), Generative AI, and modern cloud technologies.With experience developing AI-driven platforms, I work with Python Flask, OpenAI, Claude AI, Google Gemini, ElevenLabs, AI image/video generation, and API integrations to create scalable and user-focused solutions.My expertise includes building interactive web applications using Fabric.js canvas, developing AI content creation workflows, integrating third-party AI services, and deploying applications on AWS EC2 environments.I have a strong interest in exploring emerging technologies and transforming innovative ideas into practical software solutions. I enjoy solving complex technical challenges, optimizing user experiences, and continuously expanding my knowledge across AI, cloud, and automation technologies.Core Skills:Python | Flask | Generative AI | LLM Integration | OpenAI API | Claude AI | Google Gemini | Fabric.js | AWS EC2 | REST APIs | Salesforce

Experience

Flipick
AI Full Stack Engineer
April 2023 - Present (3 years 7 months)
Jaffna

- Develop AI-powered applications and intelligent content creation platforms using Python, Flask, Large Language Models (LLMs), and modern AI APIs.
- Design and implement AI workflows integrating OpenAI, Claude AI, Google Gemini, ElevenLabs Text-to-Speech (TTS), and AI image/video generation services.
- Build scalable backend services using Python Flask, handling AI integrations, data processing, and application logic.
- Develop interactive web-based editors and creative tools using Fabric.js canvas technology for AI-generated content editing and customization.

- Build AI video generation pipelines integrating LLM-based script generation, image generation, voice synthesis, avatars, and media processing workflows.
- Deploy and manage applications on AWS EC2 environments (Linux/Ubuntu and Windows), including server configuration, application deployment, and optimization.
- Collaborate with product and engineering teams to design, develop, and deliver AI-driven features for eLearning and content creation platforms.
- Focus on writing maintainable, efficient, and reliable code while improving application performance and user experience.
